

CONTENTS

ACKNOWLEDGEMENTS	11
PREFACE	13
ABBREVIATIONS	19

1

FOUNDATIONS	21
The First Axiom: Existence	22
The Second Axiom: Consciousness	26
Axiomatic Concepts	28
Consciousness: Four Fundamentals	30
1. Consciousness has an object and a subject	30
2. Existence has primacy over consciousness	32
3. Consciousness is an active process	35
4. Consciousness is a biological faculty	37
Consciousness as Irreducible	42
The Causal Efficacy of Consciousness	49
The Validity of Introspection	54

2

PERCEPTION	57
Perception as Axiomatic	58
Perception vs. Sensation	59
Sensationalism	64
Direct Realism	68
Perception as Inerrant	72
Perception vs. Conceptual Identification	73
Form vs. Object	78
Perception vs. Hallucination	84
A Final Definition of Perception	85
Three General Conceptions of Consciousness	86
1. Objectivism: consciousness as identification	86
2. Naïve Realism: consciousness as reproduction	86
3. Representationalism: consciousness as self-consciousness	88
Appearance and Reality	93

3

CONCEPT-FORMATION	97
Three Theories of Concept-Formation	101
The Realist Theory	101
The Failure of Realism	104
The Nominalist Pseudo-Theory	107
The Objectivist Theory	110
Unit	117
Measurement	119
Integration	123
Unit-Economy	129

4

HIGHER-LEVEL CONCEPTS 137

The Formation of Higher-Level Concepts	139
Wider Integrations	139
Subdivisions	142
Conceptual Hierarchy	143
Abstract vs. Concrete	149
Concepts of Characteristics	152
Concepts of Consciousness	162
Axiomatic Concepts	167

5

PROPOSITIONS 171

Classificatory Propositions	173
Descriptive Propositions	175
The Role of Grammar	178
Negative Propositions	179
The Analytic-Synthetic Dichotomy	181
Concepts vs. Propositions	183
The Cognitive Function of a Proposition	186

6

LOGIC: THEORY 191

The Three Laws of Logic	192
Logic and the Identity of Consciousness	195
Context	198
Hierarchy	205
The Spiral Process of Knowledge	208

7

LOGIC: PRACTICE	213
Logic and Concepts	214
The Function of Definitions	214
The Rules of Proper Definition	215
1. The rule of genus and differentia	216
2. The rule of reference	219
3. The rule of scope	220
4. The rule of fundamentality	222
5. The rule of unit-economy	224
Definitions as Contextual	225
Valid vs. Invalid Concepts	227
1. Concepts that Lack Units	228
2. Concepts that Misclassify Units	229
Rand's Razor	232
False division	235
False integration	236
Logic and Propositions	239
Propositions as trans-temporal	240
Defective propositions	241
1. Propositions using invalid concepts	242
2. Invalid combination of concepts	243
Truth	251
Logic and Inference	254
Deduction	254
Induction	255
Logic in a Nutshell	259

8

PROOF AND CERTAINTY	261
Certainty	271
The Law of Rationality vs. The Arbitrary	278
The Ad Ignorantiam Fallacy	285
The Burden of Proof Principle	286
What is Objectivity?	292
A Trichotomy in the History of Thought	296
The Objective Status of Concepts	296

9

PRINCIPLES 299

Fundamentality	300
What Identifying Fundamentals Accomplishes	303
Principles as Fundamental Generalizations	305
The Need for Principles	306
Principles as Cognitive Bridges	307
Principles as Simplifiers	310
Principles as Contextual	311
Principles as Absolutes	312
“Just One Contradiction”	314
An Example: Individual Rights	315
Philosophy and Principles	317

10

FREE WILL 321

Focus	324
Rationality	326
The Reality-Orientation	328
Motives and Focus	329
The Choice of Action	331
An Extended Concretization	334
Volition and Character	338
Validation of the Theory	344
Determinism: The Denial of Free Will	345
Causality and Volition	347
Focus and “The Problem of Agency”	352
Volition as Axiomatic	355
Determinism as Self-Refuting	355
Free Will and Social Environment	359
Free Will and the Ego	360

11

OVERVIEW	363
Concepts Condense Percepts	365
Two Primacies	366
Concept-Formation in Science	369
1. "Inertia"	370
2. "Natural selection"	370
3. "Germ"	370
Bottom-up vs. Top-down Theories	371
The Prose Principle	376
Some History	381
The Kantian Reversal	385
Summary	390
BIBLIOGRAPHY	391
INDEX	397
